Abies balsamea
Balsam Fir

Synéova™ is a division of Groupe SiliCycle, based in Quebec, Canada, is specialized in the extraction and purification of bioactive ingredients for nutritional and cosmetic applications. Our research and analysis platform allow precise and rigorous characterization of essential oils derived from Canada Boreal Forest biomasses. They are painstakingly distilled and thoroughly analyzed to guarantee their distinct purity and quality. Our essential oils are **100% organic, pure, natural and chemotyped**.

QUALITY STANDARDS

Our manufacturing and supply standards ensure:

- Steam distillation of healthy plant parts
- Perfect traceability of the origin of plant species
- A defined geographic origin : Canadian boreal forest
- Chromatographic analyses
- A control of the organoleptic and physicochemical characteristics
- Respect of the best manufacturing standards and of the environment

We certify authentic essential oils:

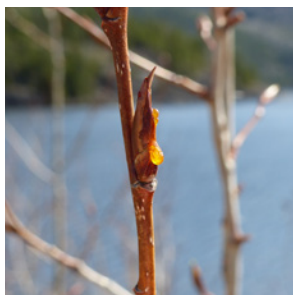

- 100% pure, natural and integral
- Organic, certified Ecocert
- Botanically controlled
- Biochemically controlled (chromatography)
